

# Equipping Principals as Instructional Leaders

NIET's work has always focused on empowering educators to lead instructional coaching for their peers. These services provide principals and school leaders with support to elevate their practice.

## PRINCIPAL STANDARDS RUBRIC

*A tool for leadership coaching, support, and evaluation*

The **Principal Standards Rubric** defines excellence in school leadership. It includes research-based performance indicators that allow principals to maximize their role as instructional leaders, and it comes with a variety of **online resources and videos** in the EE PASS portal. The EE PASS portal also includes training modules and evaluator certification.

Additionally, a **two-day rubric training** is designed to develop both an understanding of the rubric as a tool to support principals' growth as well as an understanding of the evaluation and observation process. **Virtual training** will be available starting summer 2020.

### The Principal Standards Rubric is grounded in six domains:

- School mission, vision, and strategic goal setting
- Instructional leadership
- Capacity building
- School environment/community and campus climate
- Ethics and integrity
- School operations/management

## PRINCIPAL LEADERSHIP SERIES

*Empowering principals to advance instructional excellence and equity*

NIET's **Principal Leadership Series** supports principals in growing their capacity as an effective school leader. The multi-day training series is focused on three critical areas:

- **Creating and Communicating a Culture of Equity**
- **Building Shared Instructional Leadership**
- **Sustaining Reflective Practice through Continuous Improvement and Coaching**

Collectively, these sessions develop essential mindsets and skills that empower principals to build a culture that is continuously focused on advancing instructional practices and improving outcomes for all students. **Virtual training** will be available starting summer 2020.
