

Learning Recovery Acceleration Series

Investing in high-quality instruction is the best way to accelerate learning and narrow achievement gaps, particularly following disruptions caused by the pandemic. NIET has a five-part series that will strengthen teaching and learning in ways that benefit students now and for years to come.

Session 1:

Using and analyzing data, as well as communicating needs to families and students

- Analyze reliable **data to determine trends** in student needs from unfinished learning
- Examine an **accelerated learning approach through standards and data** trend analysis
- Plan for students and teachers to **reflect, monitor, and communicate progress**
- Create a coaching plan

Session 2:

Maximizing collaborative structures to support learning recovery

- Unpack the role of the **leadership team** in supporting teachers to accelerate learning
- Learn specifically how administrators and teacher leaders can **strengthen their capacity** to support accelerated learning
- Plan for using **collaborative structures**, like PLCs and planning time, to support teachers

Session 3:

Planning for accelerated learning options and individualized learning

- Examine models for **grouping students** and identify key opportunities throughout the day
- Plan to **incorporate accelerated learning** in core instruction, small group, and individual instruction
- Strengthen the coaching plan

Recommended for school and district leadership teams
One day each; available in-person or virtually

Additional, optional sessions

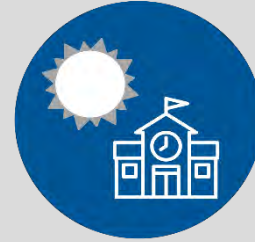

Available in-person or virtually

Session 4:

Strengthening content-specific strategies for learning recovery in math and English language arts
(Recommended for teachers and leaders; not grade-level specific. Each content area is one day.)

- Identify skills critical to **student mastery of essential standards**
- Deconstruct critical skills in order to **scaffold and segment accelerated learning** in a logical order
- Develop **thinking strategies** to support student mastery of critical skills
- Define ways to incorporate techniques **for increasing student engagement and student ownership of learning**
- Create coaching questions

Session 5:

Setting up effective summer learning opportunities
(Recommended for district, school, and teacher leaders. This session is one day.)

- **Plan for and implement systems** to support skill-specific accelerated learning practices
- Define **key elements of scope and sequence** inclusive of strategies to address student needs in core instruction, small group, and individual instruction
- Incorporate **student engagement and ownership**
- Create coaching questions
